

SmartLog V2 - Security Audit Executive Summary

Generated: 2026-06-24 03:24:31

Security Score: 62/100

Risk Level: MEDIUM

Issues by Severity

CRITICAL: 2
HIGH: 8
MEDIUM: 13
LOW: 7

Top Critical Issues

- Multiple /api/init-db endpoints without authentication
- 5 endpoints accessible without authentication

Immediate Actions Required

1. Remove all debug scripts (github_commit*.py etc.) from production
2. Add authentication decorators to all admin endpoints
3. Set SECRET_KEY via env var only (remove default from config.py)
4. Configure cookie security flags (HttpOnly, Secure, SameSite)
5. Add non-root USER to Dockerfile

Remediation Timeline

Critical (1-2 days): SEC-001, SEC-002, SEC-003
High (3-7 days): SEC-004 through SEC-010
Medium (1-4 weeks): SEC-011 through SEC-023
Low (1-3 months): SEC-024 through SEC-030
